

PRESS RELEASE

Please pass to the editor

HITEK Calibration Services, based in Foundry Lane, Horsham, are delighted to announce that they have selected the Hurst Road **SPRINGBOARD Project** to receive their £1,000 Christmas donation this year. Springboard is a local community centre, which provides a range of leisure and play facilities for local families and children including disabled and disadvantaged children.

Each year, HITEK have given their clients a token of thanks for their business at Christmas. Increasingly, however, companies are changing their policy on the receipt of gifts and HITEK have therefore taken the decision that money allocated for this purpose should be put to good use, and what better or more worthwhile cause than a local children's charity. Of course, all clients will receive Christmas cards informing them of the important part they have played in this event and those who are already aware of the donation have applauded HITEK for its decision.

Martin Kulin, MD of HITEK, will be presenting the cheque to Springboard's Project Director, Nigel Scott-Dixon on Friday 30th November 2001 at 11am.
